## About Me

I am a final-year Computer Engineering student at Konya Technical University. With a strong foundation built through both academic and practical experiences, I am confident in my abilities in the field of computer engineering. Throughout my education, I have gained in-depth knowledge of various programming languages and technologies.

I have developed strong proficiency in languages such as C, Python, and Java, and have successfully applied them in various projects. Additionally, I have specialized in modern frontend tools like HTML, CSS, SCSS, JavaScript, and React, establishing a solid foundation in web technologies. Currently, I am focusing on back-end development and actively working to enhance my skills in this area.

I have experience in creating user-friendly and dynamic web applications. Motivated by a passion for continuous learning and problem-solving, I am a flexible and adaptable engineering student. My goal is to use my knowledge and skills to create impactful projects that make meaningful contributions to the technology world.

## MY PROJECTS

To Do Project	It is a website that allows users to create, edit, and track tasks, add deadlines to use time efficiently, identify important tasks, prioritize them according to users' preferences, and automatically schedule recurring tasks at regular intervals. [Html] [Css] [Javascript] [Firebase] <a href="#">GitHub Repository</a>
Currency Translation Project	I developed a website that facilitates currency conversion between Turkish Lira (TRY), US Dollar (USD), and Euro (EUR). This tool allows users to easily convert amounts between these currencies, providing accurate and up-to-date exchange rates. The site is designed with a user-friendly interface, ensuring quick and efficient currency conversions for everyday financial needs. [Html] [Css] [React] [Database] [Responsive Design] <a href="#">GitHub Repository</a>
English WordQuiz Project	I also developed an English vocabulary quiz website that offers users feedback on the number of correct and incorrect answers. The quiz is timed, making it both challenging and engaging. The site features a fun and easy-to-use interface, making it enjoyable for users to test and improve their English vocabulary. [Html] [Bootstrap] [Css] [Javascript] [Responsive Design] <a href="#">GitHub Repository</a>
Personal Website	Currently developing a personal website showcasing my skills and projects. The site is being built using modern web technologies and is continuously being updated. <a href="#">GitHub Repository</a> [Html] [Css] [Scss] [Javascript]

## MY TRAININGS

09.2021-06.2025	Konya Teknik Üniversitesi/Bilgisayar Mühendisliği	3.02/4.00 Konya, Türkiye
09.2018-06.2021	Şehit Mehmet Lütfi Gülşen(İHL)	90.15/100(school first ) Konya, Türkiye

## LANGUAGES

Turkish (Native)  
English (B1)

## SKILLS

- React
- Javascript
- Html
- Css-Scss-Bootstrap
- Node.js
- Python
- C
- Java
- Microsoft SQL Server
